Verified by third-party testing in a controlled environment using the food pan temperature.

FASTER ACTIVATION

Proven to burn quicker than standard screw-top wick fuels.

- **Peak Temperature**
Achieves higher maximum heat
- **Fast to Food-Safe Heat**
Quickly reaches food safe serving temperatures.
- **Rapid Heat-Up**
Faster heat-up to peak burn.
- **Controlled Flame**
Narrow stem wick produces even, focused heat while minimizing waste.
